www.hgf.com

Also offices in Aberdeen, Glasgow,
Liverpool, London, Manchester,
Rugby, Sheffield and York

Chemistry

Advanced materials including: nanotube, nanoparticles, nuclear reprocessing technologies, semiconductors, alloys and steels, ceramics, plastics and polymers. Fine chemicals, chemicals for food, beverages, household and cosmetic industries. Complex catalysts, fuel cells and alternative forms of energy. Chemical processing and process optimisation. Environmental chemistry.

Electronics

Microelectronic systems and devices, microprocessors, telecommunication systems and networks, digital signal processing, computer software, network systems, medical devices, electronic surveillance security including video and RFID technologies & electronic and optoelectronic materials and devices.

Engineering

Mechanical and electro-mechanical devices, automotive engineering, aerospace components, propulsion systems, metallurgy and metallurgical processing, nuclear engineering, composite materials, metal matrix composites, drug delivery, dental implants, orthopaedic surgical instruments, fracture reduction and fixation, endoscopy, onshore and offshore piping and childrens toys.

Law

IP enforcement and defence; dispute resolution and litigation; IP contracts; licensing and technology transfer; internet and domain name issues; related UK and EU competition law.

Life Sciences

Gene therapies, transgenic technology, biological therapeutics including protein-based drugs, diagnostic assays, devices including medical devices and diagnostic devices, transplant technology, vaccines, drug formulations, plant technology.

Nanotechnology

Carbon nanotubes, nanowires, spintronics, nanoscale cages, transmission electron and scanned probe microscopes, nano-particles for drug delivery, micro and nano electromechanical systems and devices (MEMS and NEMS), single electron devices, nanomaterials for filtration, biochip devices, GeneChip[®] technology, sub micron lithography, fullerenes, magnetic nanoparticles, gene therapy & microspheres.

Pharma

Active principals; follow on products; processes for preparing actives; secondary indications; polymorphic forms; and process development.

Trade Marks

Trade mark infringement, clearance and opinion work registration of designs and trade marks worldwide. UK and EU (OHIM) trade mark oppositions and appeals multi-jurisdictional and trade mark searches and watching internet and domain name issues. Advice on copyright and unregistered design rights matters worldwide.
